IAS/Q3006: Building Automation Specialist

Brief Job Description

Performs system design, wiring, integration, testing, installation & maintenance of automation systems in buildings involving HVAC, FAS, ACS & CCTV Systems.

Personal Attributes

This job requires interdisciplinary aptitude, ability to learn, ability to deal with a variety of technology and people of different trades and skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. IAS/N2100: Design, Install and Provide Technical Support for HVAC System

2. IAS/N2101: Design, Install and Provide Technical Support for Fire Alarm Systems

3. IAS/N2102: Install and Provide Technical Support for Access Controls Systems

4. IAS/N2103: Install and Provide Technical Support for CCTV Surveillance Systems

5. IAS/N2104: Integrating and Controlling Building automation System

6. IAS/N9001: Work effectively with teams

7. IAS/N9002: Health and safety in workplace

8. DGT/VSQ/N0102: Employability Skills (60 Hours)

Qualification Pack (QP) Parameters

Sector	Instrumentation
Sub-Sector	Instrumentation & Automation
Occupation	Product Engineering/System Design
Country	India
NSQF Level	5

Credits	19
Aligned to NCO/ISCO/ISIC Code	NCO-2015/2149.0100
Minimum Educational Qualification & Experience	10th Class (3 Years Engineering diploma in relevant field) OR 10th Class (2 year NTC/NAC + 01 year experience in relevant field) OR Completed 1st year of 3-year diploma (after 10th) and pursuing regular diploma ((after 12th or 2 years NTC)) OR Completed 1st year of 3-year diploma (after 10th) and pursuing regular diploma (or Pursuing 2nd year of BE/B-Tech in relevant field)
Minimum Level of Education for Training in School	
Pre-Requisite License or Training	NA
Minimum Job Entry Age	19 Years
Last Reviewed On	NA

IAS/N2100: Design, Install and Provide Technical Support for HVAC System

Description

This OS unit is about Design, Installation, Supervision, Testing and providing Technical Support of HVAC Systems involved in building automation systems.

Scope

The scope covers the following :

- This unit/task covers the following: Capturing the requirements of HVAC Systems by site survey Suggesting and taking approval from the customer for HVAC Systems Installing approved HVAC components as per site requirements Wiring Electrical and Electronics components as per specifications Testing of HVAC systems Providing Technical Support for HVAC Systems

Elements and Performance Criteria

Capturing the requirements of HVAC Systems by site survey

To be competent, the user/individual on the job must be able to:

PC1. Capturing work requirements of the client by site survey

PC2. Developing BOQ according to the requirement of the client

PC3. Creating 2D models using BAS Software

PC4. Developing program on BAS Tools for HVAC

PC5. Developing program on BAS Tools based on Logic gates

PC6. Developing program related to Air Conditioning on BAS Tools

PC7. Managing wiring of components in AC Drives and Soft Starters

Suggesting and takingapproval from the customer for HVAC Systems

To be competent, the user/individual on the job must be able to:

PC8. Suggesting appropriate HVAC components to the customer according to the site

PC9. Assisting the customer in choosing different types of technologies and specifications used in HVAC Systems

PC10. Taking approval from the customer

PC11. Maintaining complete documentation of the components to be installed

Installing approvedHVAC components as per site requirements

To be competent, the user/individual on the job must be able to:

PC12. Collecting and checking of components at customer premises as per checklist

PC13. Installing HVAC components including VFD at site as per the requirement

PC14. Installing AHU (Air Handling Unit)

PC15. Installing Chiller

PC16. Installing Sensors

PC17. Installing VAV (Variable Air Volume), TFA (Treated Fresh Air) etc.

Wiring Electrical and Electronics components as per the requirements

To be competent, the user/individual on the job must be able to:

PC18. Wiring Power Supplies, Earthing & Grounding

PC19. Wiring and connecting Shielded & Unshielded Cables, Cable Gauges & AWG sizes

PC20. Wiring of HVAC hardware PC

Testing of HVAC systems

To be competent, the user/individual on the job must be able to:

PC21. Testing of installed HVAC System

PC22. Ensuring proper working of the installed HVAC System

PC23. Assuring 100% satisfaction from the customer after installation

PC24. Troubleshooting errors if the system is not working as per the requirements

Providing Technical Support for HVAC Systems

To be competent, the user/individual on the job must be able to:

PC25. Calculating total number of HVAC controllers as per I/O summary

PC26. Managing refrigeration process needed for the site by BAS controller

PC27. Managing Wiring and drawings of Components used in Centralized Air-Conditioning

PC28. Providing Technical Support for HVAC functions using BAS controller

PC29. Calculating Heat Load

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Company policies on delivery standards, services and warranty

KU2. Company sales and after sales policies

KU3. Sequence of reporting for each process

KU4. Companies policies on incentives and reimbursement

KU5. Latest technologies introduced by the company for Fire Alarm Systems

KU6. Complete knowledge of the HVAC processing consideration

KU7. Operation of machinery and equipment being used for HVAC process

KU8. Engineering drawings of existing layout/equipment

KU9. Electrical/electronic standard parts

KU10. Understanding Basic concepts of Electrical and Electronics Engineering

KU11. Knowledge of different detection technologies used in fire alarm systems

KU12. Material and information flow of HVAC process

KU13. Understanding Installation procedures given in the manuals

KU14. Power Requirements by different components used in HVAC

KU15. Knowledge of safety measures and quality standards of fire alarm components

KU16. Knowledge of integrating other systems with fire alarm systems

KU17. Compete knowledge of fire alarm system works under considerations

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Compile all the data related to main and auxiliary equipment required in the process

GS2. Compile all the data related to study of existing facility in the form of presentation and reports

GS3. Record Faults in instruments.

GS4. Read the equipment literature and understand its features

GS5. Read the information displayed at the workplace

GS6. Discuss task lists, schedules, and work-loads with co-workers

GS7. Communicate the new equipment and facilities design activities to the higher management in meetings for their support

GS8. Spell out effectively the findings of the study to the higher management in meetings

GS9. Interact with coworkers and gather all the information related to process requirement

GS10. Make decisions pertaining to the concerned area of work

GS11. Plan the execution of entire project detailing long term and short term activities so that he/she can finish the project in the stipulated time.

GS12. Organize expert support from/within outside organization for new technology and feasibility studies.

GS13. Understand real needs of the customer and suggest most appropriate solution

GS14. Support customer when they need help

GS15. Think through the problem, evaluate the possible solution(s) and suggest an optimum/best possible solution(s)

GS16. Identify immediate or temporary solutions to resolve delays

GS17. Use the existing information to arrive at actionable decision points

GS18. Use the existing information for improving the customer satisfaction

GS19. Use the existing information to optimize solution and company business

GS20. Analyze problems and identify causes and possible solutions

GS21. Apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

GS22. Analyze the way in which the existing facility layout is in operation and think of more economic and feasible measures for existing layout modification.

Assessment Criteria

IAS/N2101: Design, Install and Provide Technical Support for Fire Alarm Systems

Description

This OS unit is about design, installation, supervision and testing of Fire Alarm Systems in building automation systems.

Scope

The scope covers the following :

- This unit/task covers the following:
- Capturing the requirements of Fire Alarm Systems by site survey
- Suggesting and taking approval from the customer for Fire Alarm System
- Installing approved Fire Alarm components as per site requirements
- Wiring Electrical and Electronics components as per specifications Testing of new systems at customer premises
- Providing Technical Support for Fire Alarm Systems at the site

Elements and Performance Criteria

Capturing the requirements of Fire Alarm Systems by site survey

To be competent, the user/individual on the job must be able to:

PC1. Capturing work requirements of the client by site survey

PC2. Developing BOQ according to the requirement of the client

PC3. Assisting customer about different types of technologies used in FAS according to the need of site

PC4. Ensuring that Suggesting components matches to customers requirement

PC5. Assisting the customers about the company policies towards services and warranty

PC6. Managing proper documentation of site survey and customers requirements

Suggesting and taking approval from the customer for Fire Alarm Systems

To be competent, the user/individual on the job must be able to:

PC7. Suggesting appropriate FAS components to the customer according to the site

PC8. Assisting the customers about Fire Alarm systems with their specifications

PC9. Taking approval for installing FAS components from the customer

PC10. Preparing and assembling FAS components as per the requirement

PC11. Creating check list before going to the site for installation

PC12. Maintaining complete documentation of the components to be installed

Installing approvedFire Alarm components as per site requirements

To be competent, the user/individual on the job must be able to:

PC13. Collecting and checking of components before moving to customer premises

PC14. Assisting technicians for checking hardware components before FAS Installation

PC15. Replacing FAS components if found malfunctioning

PC16. Preparing Checklist and ensure the availability of every component before installation

PC17. Installing FAS components at the customers site

PC18. Installing fire Detection components as per site requirement

PC19. Installing Heat/RoR Detectors, Smoke Detectors and Multi Criteria detectors as per requirement

Wiring Electrical andElectronicscomponents as per the requirements

To be competent, the user/individual on the job must be able to:

PC20. Wiring Power Supplies, Earthing & Grounding

PC21. Wiring and connecting Shielded & Unshielded Cables, Cable Gauges, SWG & AWG sizes

PC22. Ensuring adequate length of connecting cables as per the requirements

PC23. Wiring of FAS hardware

PC24. Using proper terminals as prescribed for joining cables

PC25. Use power cable for connecting power supply with proper rating

Testing of newsystems at customer site

To be competent, the user/individual on the job must be able to:

PC26. Testing installed FAS components at customer premises

PC27. Ensuring proper working of every component

PC28. Ensuring proper working of FAS systems before leaving the site and explaining the customer how to operate the system properly

PC29. Assuring 100% satisfaction from the customer after installation

PC30. Troubleshooting the errors if the system is not working as per the requirements

Providing TechnicalSupport for Fire AlarmSystems at the site

To be competent, the user/individual on the job must be able to:

PC31. Providing Technical Support for Fire Detection & Alarm System as per Fire Life cycle and Class of Fire

PC32. Providing Technical Support for intelligent Fire Panels & conventional Fire Panels installed

PC33. Managing Detector & Device Wiring Schema

PC34. Integrating Fireman's Telephony & Talkback system with fire alarm

PC35. Selecting Fire Safety Strategies for prevention

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Company policies on delivery standards, services and warranty

KU2. Company sales and after sales policies

KU3. Sequence of reporting for each process

KU4. Companies policies on incentives and reimbursement

KU5. Latest technologies introduced by the company for Fire Alarm Systems

KU6. Complete knowledge of the FAS process in consideration

KU7. Operation of machinery and equipment being used for FAS process

KU8. Engineering drawings of existing layout/equipment

KU9. Electrical/electronic standard parts

KU10. Understanding Basic concepts of Electrical and Electronics Engineering

KU11. Knowledge of different detection technologies used in fire alarm systems

KU12. Material and information flow of FAS process

KU13. Understanding Installation procedures given in the manuals

KU14. Power Requirements by different components used in FAS

KU15. Knowledge of safety measures and quality standards of fire alarm components

KU16. Knowledge of integrating other systems with fire alarm systems

KU17. Compete knowledge of fire alarm system works under considerations

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Compile all the data related to main and auxiliary equipment required in the process

GS2. Compile all the data related to study of existing facility in the form of presentation and reports

GS3. Record Faults in instruments.

GS4. Read the equipment literature and understand its features

GS5. Read the information displayed at the workplace

GS6. Discuss task lists, schedules, and work-loads with co-workers

GS7. Communicate the new equipment and facilities required to the higher management in meetings for their support

GS8. Spell out effectively the findings of the study to the higher management in meetings

GS9. Interact with coworkers and gather all the information related to process requirement

GS10. Make decisions pertaining to the concerned area of work

GS11. Plan the execution of entire project detailing long term and short term activities so that he/she can finish the project in the stipulated time.

GS12. Organize expert support from/within outside organization for new technology and feasibility studies.

GS13. Understand real needs of the customer and suggest most appropriate solution

GS14. Support customer when they need help

GS15. Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)

GS16. Identify immediate or temporary solutions to resolve delays

GS17. Use the existing information to arrive at actionable decision points

GS18. Use the existing information for improving the customer satisfaction

GS19. Use the existing information to optimize solution and company business

GS20. Analyze problems and identify causes and possible solutions

GS21. Apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

GS22. Analyze the way in which the existing facility layout is in operation and think of more economic and feasible measures for existing layout modification.

IAS/N2102: Install and Provide Technical Support for Access Controls Systems

Description

This OS unit is about Installing and Commissioning Access Controls Systems at the customers premises

Scope

The scope covers the following :

- This unit/task covers the following: Capturing the requirements of Access Controls Systems by site survey Suggesting and taking approval from the customer for Access Controls System Installing approved Access Controls components as per site requirements Wiring Electrical and Electronics components as per specifications Testing Access Control systems at customer premises Providing Technical Support for Access Controls Systems Achieving Quality and Productivity as per company norms

Elements and Performance Criteria

Capturing the requirements of Access Controls Systems by site survey

To be competent, the user/individual on the job must be able to:

PC1. Capturing work requirements of the client by site survey

PC2. Developing BOQ according to the requirement of the client

PC3. Assisting customer about different types of technologies used in Access Control Systems according to the need of site

PC4. Ensuring that Suggesting components matches to customers requirement

PC5. Assisting the customers about the company policies towards services and warranty

PC6. Managing proper documentation of site survey and customers requirements

Suggesting and taking approval from the customer for Access Controls System

To be competent, the user/individual on the job must be able to:

PC7. Suggesting appropriate Access Controls components to the customer according to the site

PC8. Assisting the customers about technologies used in Access Control systems with their specifications

PC9. Taking approval for installing Access Control Systems from the customer

PC10. Preparing and assembling Access Control Systems components as per the requirement

PC11. Creating check list before going to the site for installation

PC12. Maintaining complete documentation of the components to be installed

Installing approved Access Controls components as per site requirements

To be competent, the user/individual on the job must be able to:

PC13. Collecting and checking of components before moving to customer premises

PC14. Assisting technicians for checking hardware components before Installation

PC15. Replacing components if found malfunctioning

PC16. Preparing Checklist and ensure the availability of every component before installation

PC17. Installing components at the customers site

PC18. Installing hardware such as smart hub, RFID Card, Door control unit, card readers etc.

PC19. Ensuring that components are matching with customers requirement and installed as per standard operating operation

Wiring Electrical and Electronics components as per specifications

To be competent, the user/individual on the job must be able to:

PC20. Determining the type of cable requirement for different types of network type such as USB, twisted pair, etc.

PC21. Ensuring adequate length of cables are available for installation

PC22. Wiring of Power Supplies, Earthing & Grounding.

Testing Access Control systems at customer premises

To be competent, the user/individual on the job must be able to:

PC23. Checking voltage and resistance at all appropriate points of the system

PC24. Correcting alignment and operation of access point hardware

PC25. Verifying access levels

PC26. Checking correct operation of each reader

PC27. Testing Release time for each lock using software

PC28. Checking the signals if doors are held open and signaling is required

PC29. Checking all the data for correct entry in the ACS software

PC30. Checking alarms to display correctly

PC31. Defining level of particular object in the software

Providing Technical Support for Access Controls Systems

To be competent, the user/individual on the job must be able to:

PC32. Identifying the operating system and software requirement for the access control system

PC33. Providing Technical Support for Access controls devices at the customer premises

PC34. Commissioning Access Controls Systems performance as per customer requirements

PC35. Achieving zero errors in commissioning as per company policy

PC36. Identifying problems and alert on time

PC37. Fixing for any errors (if any) identified

PC38. Verifying software implementation checks of input/output I/O points (AI, AO, DI,DO)

PC39. Verifying sensor calibration, control sequence logic, graphics and alarm code

PC40. Performing software functionality test

Achieving Quality and Productivity as per company norms

To be competent, the user/individual on the job must be able to:

PC41. Achieving 100% work schedule as planned for the week

PC42. Meeting 100% daily or monthly target

PC43. Achieving zero component damage

PC44. Keeping work area clean and organized

PC45. Identifying problems and alert in time

PC46. Achieving 100% compliance with health and safety guidelines and rules

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Companys policies on: incentives, delivery standards and personnel management, customer management
KU2. Reporting and documentation processes
KU3. Importance of the individuals role in the workflow
KU4. Reporting structure
KU5. Access Control System process
KU6. Operation of components used in Access Control system
KU7. Engineering drawings and layout of site
KU8. Electrical/electronic/mechanical parts required for the ACS
KU9. Material requirement of components with their specifications
KU10. Equipment used in Access Controls system
KU11. Knowledge of Graphic Generation Tools in BAS
KU12. Understanding of Direct Digital Controllers in BAS
KU13. Knowledge of communication between ACS and other devices
KU14. Knowledge of programming in BAS softwares
KU15. Knowledge of devices communication protocols
KU16. Knowledge of integrating communication protocols
KU17. Knowledge of different types of cables used for data transmission and power transmission
KU18. Power requirements of hardware
KU19. Different types of access controls hardware available in the market

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Preparing indents and list of equipment required for the specified Access Controls System
GS2. Compiling all the related documents as per the requirements
GS3. Record Faults in instruments and submit to the team leader.
GS4. Read warnings, instructions and other text material on product levels, components etc.
GS5. Reading drawings and job sheets or work orders
GS6. Discuss work load with superiors
GS7. Communicate with team leader for proper understanding of the work
GS8. Interact with coworkers and gather all the information related to process requirement
GS9. Make decisions according to the situations

GS10. Plan the execution of entire design activity; long term and short term activities so that he can finish the task activity wise in the stipulated time.

GS11. Organize expert support from/within outside professional environment for new technology and feasibility studies.

GS12. Understand real needs of the customer and suggest appropriate solution

GS13. Support customers when they need help

GS14. Think and provide best possible solution required for the system

GS15. Identify immediate or temporary solutions to resolve delays

GS16. Use the existing information to arrive at actionable decision points

GS17. Use the existing information for improving the customer satisfaction

GS18. Use the existing information to optimize solution and company business

GS19. Analyze problems and identify causes and possible solutions

GS20. Analyze the work flow and suggest superiors to provide improvement for better production

Assessment Criteria

IAS/N2103: Install and Provide Technical Support for CCTV Surveillance Systems

Description

This OS unit is about Installing and Providing Technical Support for CCTV Surveillance Systems at the customers premises

Scope

The scope covers the following :

- This unit/task covers the following: Capturing the requirements of CCTV Surveillance Systems by site survey Suggesting and taking approval from the customer for CCTV System to be installed Installing approved CCTV components as per site requirements Wiring Electrical and Electronics components as per specifications Testing CCTV systems at customer premises Providing Technical Support for CCTV Systems Achieving Quality and Productivity as per company norms

Elements and Performance Criteria

Capturing the requirements of CCTV Surveillance Systems by site survey

To be competent, the user/individual on the job must be able to:

PC1. Capturing work requirements of the client by site survey

PC2. Developing BOQ according to the requirement of the client

PC3. Assisting customer about different types of technologies used in CCTV Surveillance Systems according to the need of site

PC4. Ensuring that Suggesting components matches to customers requirement

PC5. Assisting the customers about the company policies towards services and warranty

PC6. Managing proper documentation of site survey and customer requirements

Suggesting and taking approval from the customer for CCTV System to be installed

To be competent, the user/individual on the job must be able to:

PC7. Suggesting appropriate CCTV components to the customer according to the site

PC8. Assisting the customers about technologies used in CCTV systems with their specifications

PC9. Taking approval for installing CCTV Systems from the customer

PC10. Preparing and assembling CCTV Systems components as per the requirement

PC11. Creating check list before going to the site for installation

PC12. Maintaining complete documentation of the components to be installed

Installing approved CCTV components as per site requirements

To be competent, the user/individual on the job must be able to:

PC13. Assisting procurement of hardware required for CCTV system installation

PC14. Collecting and checking of components before going to customer premises

PC15. Assisting technicians for checking hardware components before Installation

PC16. Replacing components if found malfunctioning

PC17. Preparing Checklist and ensure the availability of every component before installation

PC18. Installing CCTV components at the customers site

PC19. Mounting the CCTV camera so as to cover maximum area

PC20. Deciding on the height of camera installation according to the end purpose

PC21. Setting up the camera such as pan, tilt, zoom unit as per customer requirements

PC22. Set camera controls

PC23. Connecting the power and video output cable to the camera

PC24. Ensuring that all the hardware matches the customer requirement, agreed features and specifications

Wiring Electrical and Electronics components as per specifications

To be competent, the user/individual on the job must be able to:

PC25. Determining the type of cable requirement for different types of network type such as USB, twisted pair, etc.

PC26. Ensuring adequate length of cables are available for installation

PC27. Wiring Power Supplies, Earthing & Grounding.

PC28. Laying the cables in the building or site to connect the camera and system

PC29. Using BNC connectors for joining cables and crimping them

PC30. Using power cable of specified thickness to connect CCTV system with power supply

PC31. Connecting all the cables from multiple cameras to the CCTV system area

Testing CCTV Components at customer premises

To be competent, the user/individual on the job must be able to:

PC32. Checking voltage and resistance at all appropriate points of the system

PC33. Correcting alignment and operation of CCTV hardware

PC34. Checking correct operation of each component. Ensure that there are no malfunctioning, if yes than replace the component

PC35. Checking the signals of CCTV components

PC36. Checking all the data received by CCTV as per the requirement

PC37. Ensuring that there are no cable joins, sharp bends during cabling

PC38. Ensure 100% satisfaction from customers for all the installed components

Providing Technical Support for CCTV Systems

To be competent, the user/individual on the job must be able to:

PC39. Providing Technical Support for CCTV devices at the customer premises

PC40. Commissioning CCTV Systems performance as per customer requirements

PC41. Achieving zero errors in commissioning as per company policy

PC42. Identifying problems and alert on time

PC43. Fixing for any errors (if any) identified

PC44. Verifying software implementation checks;(AI, AO, DI,DO) I/O points

PC45. Ensuring zero-material damage while handling the equipment during installation process

PC46. Performing software functionality test

Achieving Quality and Productivity as per company norms

To be competent, the user/individual on the job must be able to:

PC47. Achieving 100% work schedule as planned for the week

PC48. Following standard operating procedure of tools and equipment and avoid any hazard

PC49. Achieving zero component damage

PC50. Keeping work area clean and organized

PC51. Achieving 100% compliance with health and safety guidelines and rules

PC52. Ensuring installed components as per company norms and standards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Companys policies on: incentives, delivery standards and personnel management, customer management

KU2. Reporting and documentation processes

KU3. Importance of the individuals role in the workflow

KU4. Reporting structure

KU5. Complete knowledge of CCTV Surveillance System

KU6. Knowledge of Ethernet and I/P & Industrial Networks

KU7. Operation of components used in CCTV system

KU8. Elements of CCTV systems such as camera, DVR, monitor

KU9. Electrical/electronic/mechanical parts required for the ACS

KU10. Material requirement of components with their specifications

KU11. Installation procedures given in the manuals

KU12. Different type of cables used for data transmission and power transmission

KU13. Power requirement of different CCTV related equipment

KU14. Knowledge of communication between CCTV and other BAS components

KU15. Video recording of footage analog and digital

KU16. Different types of camera available in the market

KU17. Camera specifications such as focus, lens type, zoom

KU18. Controls of different options in camera such as rotation, speed of movement in pan / tilt camera

KU19. Voltage and power requirement for different hardware devices

KU20. How to operate the system and other hardware

KU21. Understanding of Networks protocols

KU22. Safety rules, policies and procedures

KU23. Quality standards to be followed

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Preparing indents and list of equipment required for the specified Access Controls System

GS2. Compiling all the related documents as per the requirements

GS3. Record Faults in instruments and submit to the team leader.

GS4. Read warnings, instructions and other text material on product levels, components etc.

GS5. Reading drawings and job sheets or work orders

GS6. Discuss work load with superiors

GS7. Communicate with team leader for proper erstanding of work

GS8. Interact with coworkers and gather all the information related to process requirement

GS9. Make decisions according to the situations

GS10. Plan the execution of entire design activity; long term and short term activities so that he can finish the task activity wise in the stipulated time.

GS11. Organize expert support from/within outside professional environment for new technology and feasibility studies.

GS12. Understand real needs of the customer and suggest most appropriate solution

GS13. Support customer when they need help

GS14. Think and provide best possible solution required for the system

GS15. Identify immediate or temporary solutions to resolve delays

GS16. Use the existing information to arrive at actionable decision points

GS17. Use the existing information for improving the customer satisfaction

GS18. Use the existing information to optimize solution and company business

GS19. Analyze problems and identify causes and possible solutions

GS20. Analyze the work flow and suggest superiors to provide improvement for better production

IAS/N2104: Integrating and Controlling Building automation System

Description

This OS unit is about Integrating CCTV Surveillance Systems, Fire Alarm Systems, Access Control Devices and HVAC Components in the control Panel

Scope

The scope covers the following :

- This unit/task covers the following: Integrating HVAC Components Integrating Fire Alarm Systems Integrating Access Control Devices Integrating CCTV Surveillance Systems Controlling and Supervising Building Automation Systems using Control Panel.

Elements and Performance Criteria

Integrating HVAC Components

To be competent, the user/individual on the job must be able to:

PC1.   Installing and Controlling HVAC Components using DDC Controllers

PC2.   Graphically monitor, control, alarm and diagnose Building Equipment remotely

PC3.   Creating communication between DDC Controllers using data Bus

PC4.   Using BACnet, LON(Echelon) and MODBUS to communicate on data Bus

PC5.   Integrating installed HVAC Components with other Building Automation Systems using Software and programming on Single Control Panel

Integrating Fire Alarm Systems

To be competent, the user/individual on the job must be able to:

PC6.   Integrating different detectors such as Heat, Smoke, Flame Ionization Detectors, Beam Detectors etc. with control panel

PC7.   Using Conventional Systems and analogue addressable systems for fire panels

PC8.   Creating and testing communication between control panel and detectors

PC9.   Using Intelligent addressable systems as per the requirement

PC10. Integrating Fire Alarm Components with central fire alarm system

PC11. Integrating Fire alarm system with centralized control panel

Integrating Access Control Devices

To be competent, the user/individual on the job must be able to:

PC12. Inter facing between different networks used in Access Controls systems

PC13. Integrating tailgate detectors to remove unauthorized access

PC14. Controlling and monitoring multiple doors using reader controllers

PC15. Creating communication between control panel and access control servers

PC16. Integrating DIU (Door interface Units)

PC17. Integrating access control and intrusion detection

PC18. Installing Biometric systems on application device

PC19. Installing and creating communication between magnetic locks and doors

PC20. Managing Smart card management systems

PC21. Integrating Access Control System with Time/Attendance payroll system

PC22. Managing Weigand Communication for specific interface between card and readers.

PC23. Integrating Access Control devices with BAS control Panel

Integrating CCTV Surveillance Systems

To be competent, the user/individual on the job must be able to:

PC24. Managing Iris and Auto Iris functionality of installed CCTV System

PC25. Managing Automatic Shutter Speed

PC26. Creating communication between CCTV Camera and DVR or NVR

PC27. Managing Automatic Gain Control

PC28. Managing Synchronization between installed CCTV Camera

PC29. Creating communication between IP cameras and network

PC30. Managing NVR and NVR Software

PC31. Installing and managing Facial and number plate recognition system

PC32. Integrating CCTV Surveillance System with Security system to provide centralized management of access control

PC33. Integrating centralized Access Control System with Building Automation System control Panel

Controlling and Supervising Building Automation Systems using Control Panel

To be competent, the user/individual on the job must be able to:

PC34. Testing of overall integrated Building Automation System through control panel

PC35. Ensuring proper working and controlling of every installed device using control panel

PC36. Assuring 100% satisfaction from the customer after installation of BAS

PC37. Troubleshooting errors if the system is not working as per the requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Company manufacturing processes

KU2. Existing layout for the processes

KU3. Sequence of operations for each process

KU4. Facility planning methodology being followed in the company

KU5. Future capacity expansions plans (if any) of the company

KU6. Complete knowledge of the BAS Software Integration

KU7. Understanding of the latest technologies used in HVAC Systems

KU8. Fire alarm system technology and components used

KU9. Access controller installation and integration techniques

KU10. Standard Electrical/electronic parts and assemblies

KU11. Standard Mechanical, pneumatic and hydraulic parts and assemblies

KU12. Understanding wiring and drawings for communication

KU13. Integrating all the components as per customers requirement

KU14. Understanding refrigerants, chillers and components used in air conditioning system

KU15. Understanding fixed air volume and variable air volume applications

KU16. Understanding Psychometrics

KU17. Knowledge of sensors, actuators, input devices, output devices, logic statements and PID loops

KU18. Understanding point scheduling and I/O summary

KU19. Knowledge of Building Management System (BMS) graphics screens and tags

KU20. Knowledge of Ethernet and I/P & Industrial Networks such as MODBUS, LON, BAC net etc.

KU21. Understanding Direct Digital Controllers in BAS

KU22. Understanding Laws of Thermodynamics

KU23. Understanding characteristics of fire classes

KU24. Understanding Fire Detection technologies

KU25. Knowledge of Fire panel Technologies

KU26. Understanding detectors and device wiring schema

KU27. Knowledge of Firemans Telephony, Talkback systems and Mass Evacuation

KU28. Understanding Peer-to-peer & Daisy Chain Networks

KU29. Understanding NFPA Guidelines and fire safety strategies

KU30. Knowledge of Access control System components such as Magnetic swipe, RF proximity cards, smart cards, Mifare smart cards, i-class smart cards, readers etc.

KU31. Understanding data encryption and security

KU32. Knowledge of complete CCTV Surveillance system and components used

KU33. Understanding power requirements of different components

KU34. Knowledge of different cables used with their specifications

KU35. Knowledge of different types of camera technologies used with their specifications

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Compile all the data related to main and auxiliary equipment required in the process

GS2. Compile all the data related to study of existing facility in the form of presentation and reports

GS3. Record Faults in instruments.

GS4. Read the equipment literature and understand its features

GS5. Read the information displayed at the workplace

GS6. Discuss task lists, schedules, and work-loads with co-workers

GS7. Communicate the new equipment and facilities design activities to the higher management in meetings for their support

GS8. Spell out effectively the findings of the study to the higher management in meetings

GS9. Interact with coworkers and gather all the information related to process requirement

GS10. Make decisions pertaining to the concerned area of work

GS11. Plan the execution of entire design activity; long term and short term activities so that he can finish the task activity wise in the stipulated time.

GS12. Organize expert support from/within outside professional environment for new technology and feasibility studies.

GS13. Understand real needs of the customer and suggest most appropriate solution

GS14. Support customers when they need help

GS15. Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)

GS16. Identify immediate or temporary solutions to resolve delays

GS17. Use the existing information to arrive at actionable decision points

GS18. Use the existing information for improving the customer satisfaction

GS19. Use the existing information to optimize solution and company business

GS20. Analyze problems and identify causes and possible solutions

GS21. Apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action.

GS22. Analyze the way in which the existing facility layout is in operation and think of more economic and feasible measures for existing layout modification.

IAS/N9001: Work effectively with teams

Description

This NOS unit is about building relationships and working with people and groups inside and outside the organization, using skills and habits, to achieve the team goals and objectives.

Scope

The scope covers the following :

- Work as per organisational team environment
- Communicate effectively
- Co-operate with team members and superiors
- Respect customes / preferences and gender / ability differences "

Elements and Performance Criteria

Work as per the organisational team environment

To be competent, the user/individual on the job must be able to:

PC1. identify team objectives and goals, team members by name, their role and responsibilities, greet them appropriately and respond to their greetings

PC2. comply with organisation's policies and procedures for working with team members within and outside the organisation—especially related to privacy, confidentiality and security

PC3. work as per the environment to build trust and mutual respect

PC4. participate in decision making by providing facts and figures, give / accept constructive suggestions, take initiatives to help team members arrive at workable decisions and meet the goals

PC5. accept decisions professionally and support even if they do not match suggestions and personal views

Communicate effectively

To be competent, the user/individual on the job must be able to:

PC6. communicate professionally as per organisation's protocols, using appropriate mode of communication—verbal, written, mail, phone or text—and clearly articulate the message to ensure that the receiver understands the message

PC7. listen to team members attentively, respond promptly, seek / provide clarifications if required

PC8. share important information with the team timely and refrain from overloading them with unnecessary and unsolicited information

Co-operate with team members and superiors

To be competent, the user/individual on the job must be able to:

PC9. perform own role, receive inputs from others and make adjustments within permissible rules as per requirement, to produce output in time for other team members to follow

PC10. help team members to perform their role effectively and provide any clarifications/support they need, including tools /equipment / common resources as well as resolve any contentious issues amicably, involving the team lead or the supervisor if needed

PC11. let team members know in good time if commitments cannot be carried out, explaining the reasons, and provide alternate solutions, if any; let the team lead know about this

PC12. act in the interest of the team and the organisation, take initiative to correct the wrong, seek help or escalate if needed to ensure that things do not 'fall through the gap' and team goals are achieved

Respect customs / preferences and gender / ability differences

To be competent, the user/individual on the job must be able to:

PC13. follow organisation's policies and statutory guidelines w.r.t seeking information about others' customs / preferences, making references or comments on social customs / preferences, and refrain from hurting sentiments

PC14. accommodate team members' preferences to the extent feasible, and in case they come in the way of fulfilling team goals, discuss with the supervisor/ team leader

PC15. ensure personal behaviour, conduct and communication styles, taking gender and disability of the person into consideration

PC16. list the different types of disabilities with their respective issues and ways to help them overcome challenges

PC17. use inclusive language, verbal as well as non-verbal, irrespective of the disability and the gender of the person

PC18. ensure equal treatment for all clients, colleagues and co-workers while respecting their personal space

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Organisation's policies on dress code , workplace behaviour , performance management,incentives,delivery standards,information security,etc.

KU2. Organisation's hierarchy and escalation matrix

KU3. importance of the individual's role in the workflow

KU4. work area inspection procedures and practices

KU5. different types of information that colleagues might need and the importance of providing this information when it is required

KU6. deeper understanding of actions and consequences of gender based behaviour

KU7. knowledge of gender based concepts, issues and legislation

KU8. organisation standards and guidelines to be followed for PwD and knowledge about laws, acts and provisions defined for PwD by the statutory bodies and the right way to use them including various medical conditions associated with PwD

KU9. health and safety requirements at workplace for PwD and information about various institutes working for PwD to enable in providing livelihood opportunities for PwD

KU10. rights and duties at workplace with respect to PwD and various government / private schemes and benefits available for PwD

KU11. process of recruiting people for a particular job profile w.r.t PwD and gender including rights and duties at workplace with respect to gender sensitivity

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. complete forms such as work orders, invoices and maintenance records

GS2. fill up appropriate forms,activity logs and attendance sheets as per the organisation's format in English and/or local language

GS3. write basic accident or incident report as witnessed in an appropriate format to the relevant authority

GS4. read warnings, instructions and other text material on product labels, components, etc.

GS5. read relevant signage, warnings, labels or descriptions on equipment, etc. while carrying out work activities

GS6. listen effectively and orally communicate information

GS7. ask for clarification and advice from the concerned person

GS8. make decisions on a suitable course of action or response keeping in view resource utilisation while meeting

GS9. plan and organise work to achieve targets and deadlines

GS10. understand needs of the customer, suggest most appropriate solution and support them whenever needed

GS11. match symptoms of the fault noticed to the cause of the problem

GS12. anticipate and avoid hazards that may occur during repairs because of tools, materials used or repair processes

GS13. spot process disruptions and delays

GS14. practice and acceptance of gender and its concepts

GS15. develop empathy across genders and towards PwD

GS16. reflect on own gender identity, gender roles and PwD issues

GS17. engage and participate in discussions to end gender and disability discrimination

GS18. improve and modify work practices

GS19. maintain positive and effective relationships with colleagues and customers

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
Work as per the organisational team environment	**15**	**8**	**-**	**5**
PC1. identify team objectives and goals, team members by name, their role and responsibilities, greet them appropriately and respond to their greetings	4	4	-	-
PC2. comply with organisation's policies and procedures for working with team members within and outside the organisation—especially related to privacy, confidentiality and security	4	-	-	2
PC3. work as per the environment to build trust and mutual respect	2	-	-	1
PC4. participate in decision making by providing facts and figures, give / accept constructive suggestions, take initiatives to help team members arrive at workable decisions and meet the goals	4	4	-	1
PC5. accept decisions professionally and support even if they do not match suggestions and personal views	1	-	-	1
Communicate effectively	**6**	**10**	**-**	**1**
PC6. communicate professionally as per organisation's protocols, using appropriate mode of communication—verbal, written, mail, phone or text—and clearly articulate the message to ensure that the receiver understands the message	2	6	-	1
PC7. listen to team members attentively, respond promptly, seek / provide clarifications if required	2	-	-	-
PC8. share important information with the team timely and refrain from overloading them with unnecessary and unsolicited information	2	4	-	-
Co-operate with team members and superiors	**8**	**18**	**-**	**1**

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC9. perform own role, receive inputs from others and make adjustments within permissible rules as per requirement, to produce output in time for other team members to follow	2	6	-	-
PC10. help team members to perform their role effectively and provide any clarifications/support they need, including tools /equipment / common resources as well as resolve any contentious issues amicably, involving the team lead or the supervisor if needed	-	6	-	1
PC11. let team members know in good time if commitments cannot be carried out, explaining the reasons, and provide alternate solutions, if any; let the team lead know about this	2	-	-	-
PC12. act in the interest of the team and the organisation, take initiative to correct the wrong, seek help or escalate if needed to ensure that things do not 'fall through the gap' and team goals are achieved	4	6	-	-
Respect customs / preferences and gender / ability differences	**11**	**14**	**-**	**3**
PC13. follow organisation's policies and statutory guidelines w.r.t seeking information about others' customs / preferences, making references or comments on social customs / preferences, and refrain from hurting sentiments	2	4	-	-
PC14. accommodate team members' preferences to the extent feasible, and in case they come in the way of fulfilling team goals, discuss with the supervisor/ team leader	2	-	-	1
PC15. ensure personal behaviour, conduct and communication styles, taking gender and disability of the person into consideration	2	6	-	1
PC16. list the different types of disabilities with their respective issues and ways to help them overcome challenges	1	-	-	1

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC17. use inclusive language, verbal as well as non-verbal, irrespective of the disability and the gender of the person	2	4	-	-
PC18. ensure equal treatment for all clients, colleagues and co-workers while respecting their personal space	2	-	-	-

IAS/N9002: Health and safety in workplace

Description

This OS unit is about following adequate safety procedures to make work environment safe

Scope

The scope covers the following :

- Adhere to standard safety procedures of the company
- Maintain good health and posture
- Effective waste management/recycling practices
- Adopt learning and self-direction
- Develop system thinking in problem solving
- Material/Resources conservation practices

Elements and Performance Criteria

Adhere to standard safety procedures of the company

To be competent, the user/individual on the job must be able to:

PC1. comply with general safety procedures and those for handling an equipment, hazardous material or tool, followed in the company

PC2. remove finger rings or any other metal objects likely to interfere with the work before working on the unit

PC3. use of safety materials such as goggles, gloves, ear plugs, caps, ESD pins, covers, shoes, etc.

PC4. escalate the issue about hazardous materials or things found in the premises or any breach of safety procedure in the company

PC5. ensure zero accidents at work

PC6. avoid damage of components due to negligence in ESD procedures or any other loss due to safety negligence

PC7. participate regularly in fire drills or other safety related workshops organised by the company

Maintain good health and posture

To be competent, the user/individual on the job must be able to:

PC8. maintain appropriate posture, especially in long hours of sitting or standing position and in handling heavy materials

PC9. participate in company organised health sessions such as yoga, physiotherapy or games

PC10. handle heavy and hazardous materials with care, while maintaining appropriate posture, using suitable tools and handling equipment such as trolleys, jacks and ladders

Effective waste management/recycling practices

To be competent, the user/individual on the job must be able to:

PC11. identify recyclable and non-recyclable, and hazardous waste generated to be segregated accordingly

PC12. dispose non-recyclable waste and hazardous waste as per recommended processes

PC13. deposit recyclable and reusable material at identified location

Adopt learning and self-direction

To be competent, the user/individual on the job must be able to:

PC14. understand importance of skill advancement and develop mastery

PC15. adapt product / service to meet success criteria

PC16. understand accountability for timely completion of tasks

PC17. manage to express emotions in appropriate ways at workplace and understand the cause for the emotions

Develop system thinking in problem solving

To be competent, the user/individual on the job must be able to:

PC18. analyse the problem accurately and communicate different possible solutions to the problem

PC19. manage to estimate the cause of the problem and validate

Material/Resources conservation practices

To be competent, the user/individual on the job must be able to:

PC20. identify ways to optimize usage of material including water and electricity / energy in various tasks/activities/processes

PC21. check for spills/leakages in various tasks/activities/processes and plug them or escalate to appropriate authority

PC22. carry out routine cleaning of tools, machines and equipment

PC23. check if the equipment/machine is functioning normally before commencing work and rectify wherever required and report malfunctioning (fumes/sparks/emission/vibration/noise) or any lapse in maintenance of equipment

PC24. ensure electrical equipment and appliances are properly connected and turned off when not in use

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. company's policies on incentives,delivery standards, and personnel management

KU2. company occupational safety and health policy

KU3. company emergency evacuation procedure

KU4. Company's medical policy

KU5. how to maintain the work area safe and secure

KU6. how to handle hazardous materials, tools and equipment

KU7. procedures to be followed during emergencies such as fire accidents, electrocution, etc.

KU8. long term value of good posture and use of appropriate handling equipment

KU9. electrical grounding practices

KU10. safety regulations and standards and how to apply these

KU11. common sources of pollution and ways to minimize it

KU12. categorisation of waste into dry, wet, recyclable, non-recyclable and items of single-use plastics

KU13. usage of different colours of dustbins

KU14. waste management and methods of waste disposal

KU15. organisation's procedures for minimizing mistakes

KU16. strategies pertinent to their field (such as internet searches, asking peers and managers, enrolling for courses and certifications, etc.) that can be used to pursue an advancement in their skills

KU17. one should be able to identify the key performance indicators for the new tasks

KU18. seek feedback from supervisor and deal in constructive manner

KU19. understand that emotions are accompanied by a physical state, thought and feeling

KU20. one should be able to interpret timelines and goals set by the manager and break them into sub-goals and tasks

KU21. importance of quality and timely delivery of the product/service

KU22. potential hazards, risks and threats based on the nature of work

KU23. ways of efficiently managing material and water in the process

KU24. layout of the workstation and electrical and thermal equipment used

KU25. efficient and inefficient utilization of material and water

KU26. basics of electricity and prevalent energy efficient devices

KU27. ways to recognize common electrical problems

KU28. common practices of conserving electricity

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. fill up appropriate forms, activity logs and attendance sheets as per organisation's format in English and/or local language

GS2. write basic accident or incident report as witnessed in appropriate format to relevant authority

GS3. read/listen and interpret information correctly from relevant instruction documents, manuals, health and safety instructions, memos, etc. applicable to the job, in English and/or local language

GS4. read relevant signage, warnings, labels or descriptions on equipment, etc. while carrying out work activities

GS5. question co-workers in order to understand the safety and health issues

GS6. inform co-workers about safety and health issues

GS7. report issues and problems relating to safety and health to managers in clear terms

GS8. make decisions pertaining to safety and health issues at workplace

GS9. plan and organise work conforming to the safety and health norms of the company

GS10. make decisions about escalating safety and health issues at workplace to managers

GS11. discuss problems related to safety and health, evaluate the possible solution(s) and arrive at optimum /best possible solution(s) in consultation with concerned people

GS12. use the existing information to arrive at actionable decision points

GS13. use the existing information for improving customer satisfaction

GS14. use the existing information to optimise solution and company business

GS15. analyse problems and identify causes and possible solutions

GS16. apply, analyse and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

GS17. anticipate problems, risks and opportunities and utilise these for mitigation and business optimisation

GS18. communicate with colleagues on the significance of greening of jobs

GS19. identify cause and effect of greening of jobs

GS20. record data on waste disposal at workplace

GS21. demonstrate commitment towards self, and initiative to advance skills levels by exploring various pathways to expand one's own learning

GS22. incorporate feedback into one's mental model of task, and bring it into practice

GS23. be punctual, utilize time and manage workload efficiently

GS24. evaluate strategies to maintain, enhance or reduce the intensity of heightened emotional response

GS25. test a hypothesis about the cause of the problem

GS26. identify and ask significant questions to clarify the various points of view on the problem to better understand the problem

GS27. record data on waste disposal at workplace

GS28. make timely decisions for efficient utilization of resources

GS29. complete statutory documents relevant to safety and hygiene

GS30. read Standard Operating Practices (SOP) documents

GS31. communicate with colleagues on the significance of greening of jobs

GS32. complete tasks efficiently and accurately within stipulated time

GS33. work with supervisors/team members to carry out work related tasks

GS34. identify cause and effect of greening of jobs

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. identify employability skills required for jobs in various industries

PC2. identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC3. recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.

PC4. follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC5. recognize the significance of 21st Century Skills for employment

PC6. practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC7. use basic English for everyday conversation in different contexts, in person and over the telephone

PC8. read and understand routine information, notes, instructions, mails, letters etc. written in English

PC9. write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

PC10. understand the difference between job and career

PC11. prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

PC12. follow verbal and non-verbal communication etiquette and active listening techniques in various settings

PC13. work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC14. communicate and behave appropriately with all genders and PwD

PC15. escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC16. select financial institutions, products and services as per requirement

PC17. carry out offline and online financial transactions, safely and securely

PC18. identify common components of salary and compute income, expenses, taxes, investments etc

PC19. identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC20. operate digital devices and carry out basic internet operations securely and safely

PC21. use e- mail and social media platforms and virtual collaboration tools to work effectively

PC22. use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC23. identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research

PC24. develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion

PC25. identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

PC26. identify different types of customers

PC27. identify and respond to customer requests and needs in a professional manner.

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

GS3. behave politely and appropriately with all

GS4. how to work in a virtual mode

GS5. perform calculations efficiently

GS6. solve problems effectively

GS7. pay attention to details

GS8. manage time efficiently

GS9. maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.

2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.

3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).

4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(**Please note**: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Acronyms

NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
QP	Qualifications Pack
TVET	Technical and Vocational Education and Training

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
